THERE'S
MONEY IN A
FAMILY ORCHARD

SPECIAL
DELICIOUS SAME
PRICE AS OTHER APPLES

After you have read the editorial from the Fruit Grower of St. Joseph, Mo., at the foot of this page, take a few moments and figure how much it would reduce the table costs if you grew all the fruit you could use. Probably the saving it would afford will be surprising. Home grown fresh fruits will take the place of many other table delicacies one would have to buy on the open market at constantly rising prices. Then figure the benefits in health and convenience. If we must depend on the market we often do without or take something that is not just what we want and perhaps does not answer the purpose as well. If grown at home it may be secured at a moments notice, and no fruit is so delicious as that fully ripened before picking. Where ever there is room, the family orchard will be found most profitable. And there is often a ready market for any surplus, and at good prices.

FOR THAT IDEAL HOME

you have pictured in your mind, shade trees, flowers and shrubs will also be necessary. Half the pleasure you secure from these is in the additions you make from year to year--perhaps a shade tree or two, a cluster of flowering shrubs, or some new varieties of hardy flowers or more of some old ones you particularly like. From child

hoods days we have watched for the first blossoms of spring and have enjoyed the progress of the seasons with the later flowers and the fall foliage effects. Possibly the children get the most enjoyment out of flowers--but we are all children grown up. And nothing adds a home-like touch to the house like plenty of flowers.

MONEY IN A FAMILY ORCHARD

Unless you already have a good family orchard there is no crop or combination of crops which can be grown on a small area that will equal in actual food value and satisfaction a good family orchard. In this case the word "orchard" should include all kinds of fruits, from the very earliest strawberries and dewberries to the very latest apples, pears and quinces. Unless you have learned from experience, you cannot realize the almost endless variety of fruits which are possible in a family orchard. Did you ever know an orchard that started bearing in May and continued until frost, with some sort of fruit every day during that time? Yet it is possible and very easy to accomplish in almost all sections of the United States, excepting in the most northerly portions, where the month of May is too early.

Beginning with strawberries, the list runs through currants, raspberries, gooseberries, blackberries, blueberries and grapes, plums, apples, peaches, pears and quinces. By the use of different varieties of these various fruits it is easily possible to have plenty of ripe fruit every day during the season. Take a calendar and note the time of ripening of the early and late varieties of the different fruits listed, and see if you are not surprised at the possibilities offered in even a small family orchard.—*The Fruit Grower, Nov. 15, 1916.*

IT'S PLANTING TIME NOW

If your profit from fruit and your pleasure from flowers is not to be deferred till another year, you will want to plant soon--the sooner the better. Prices will not be lower later, and probably will be higher next season. The demand is heavy, and the supply generally is not as great as last year. Delays pay no dividends. Don't put it off until you lose a year. Mail your order now and get them started.

Yours truly,

WILD BROS. NURSERY CO

Apple Profits

Very frequently we hear men question the profits to be made from apple growing in the Middle West. Just now we have a report from the owner of a 40-acre orchard in Missouri claiming that his apple crop this year sold for \$8,000 at the orchard, unpacked. Seems like an enormous amount from 40 acres, don't it? Yet there is a little 20-acre orchard in Kansas that did considerably better than that in 1915. In 1914 a 16-acre orchard in Iowa produced fruit that sold for \$5,700. So you see that the claim of this Missouri man is not at all improbable.—*Fruit Grower*, Nov. 15, 1916.

Mr. A. T. Nelson of Laclede county, Missouri, who has made an international reputation for himself and his apples, says:

"I get a good yield right along and sell all of my apples at prices that give me a good, big acreage income. I believe that there are greater possibilities for apple growers today than ever before. I believe more people should plant orchards now. I am doing so and expect to keep on doing so. I am giving my young orchard the best of care and expect to keep it up."—*Fruit Grower*, Nov. 1, 1916.

In the last sentence you will find the secret of success—care. There are thousands of acres where apples can be grown just as successfully as in the famous apple regions if given care, and that is necessary even in those sections.

The ripening dates are approximate average here; allow about five to seven days for each 100 miles North or South. The altitude will also affect the date of ripening.

Price of Two Year Apple

	Each	Per 10	Per 100
XX size about 4 1/2 ft. and up 11/16 in. cal. and up, branched.....	\$0.25	\$2.25	\$20.00
Extra size, about 4 to 5 ft., 5/8 in. cal. and up, branched.....	.20	1.75	16.00
Standard size, about 3 1/2 to 4 1/2 ft., 1/2 to 5/8 in. cal., branched.....	.15	1.40	12.50
Medium size, 3 to 4 ft., more or less branched.....	.12	1.00	7.50

Five of a variety at 10 rate, less at each rate; 50, not less than 10 of a variety, at 100 rate.

Summer Apples

Benoni—Deep red on rich yellow; juicy, pleasant, mild subacid; good; early to mid-July.

Connor's Sweet—Light red, slightly striped; medium large, fine grained; one of the best sweet summer apples; latter August.

Duchess of Oldenburg—Yellow, almost covered with red stripes; good size; juicy, rather acid; excellent for cooking and market; July 15-Aug.

Early Harvest—Bright straw; crisp, juicy, rich subacid; good, June 20-July; productive.

Livland Raspberry—Waxy, white-striped light crimson; juicy, mild subacid, almost sweet; medium size, fine quality; a young bearer; very early.

Red June—Very red; juicy, brisk subacid; good; latter June-July; a young, abundant bearer.

Sweet June—Light yellow; very sweet; medium size; very productive; June-July.

Yellow Transparent—Yellowish-white; good size; juicy, sprightly subacid; good; mid-June, some earlier than Early Harvest; bears young.

Autumn Apples

Malden Blush—Large, clear yellow, crimson cheek; very juicy; good, mid-autumn; bears young

Wealthy—Large; bright red; very juicy, agreeable subacid; Sept.-Oct.; hardy, productive.

Winter Apples

Arkansas Black—Medium large; almost black; flesh yellow; subacid; Dec.-March; unproductive on some soils; commands a good price where it can be grown.

York Imperial—Large; attractive greenish-yellow shaded red and crimson; firm, crisp, juicy, subacid becoming mild; Dec.; bears heavily.

Delicious—Roundish conic, medium to large, pale yellow, mostly covered with red, splashed and striped dark earmine; juicy, mild subacid; good.

	Each	Per 10	Per 100
XX size, 2 year.....	\$0.30	\$2.80	\$25.00
Extra size, 2 year.....	.25	2.00	20.00
Standard size, 2 year.....	.20	1.75	15.00
Medium size, 2 year.....	.15	1.50	10.00
Light size, 2 year.....	.10	.80	7.00

Above prices apply to Delicious only; all other varieties quoted at beginning of apple list.

Gano—Large; attractive rich red to maroon, rarely striped; firm, moderately crisp, juicy, mild subacid; ships well, keeps well, bears young, regularly and abundantly; profitable; of the Ben Davis type and season but more highly colored.

Grimes Golden—Of best quality; beautiful golden yellow, medium to large; crisp, juicy, rich subacid; fine dessert apple, good for cooking; Oct.-Dec.; blooms late; bears young.

Huntsman—Large; deep yellow, usually blushed; juicy, mild subacid; good, Nov.-Dec.

Ingram—A very late keeper; yellow, almost covered with bright red stripes; juicy, mild subacid; good; blooms late; bears young and heavily.

Jonathan—Very attractive lively deep red; high flavor; excellent for dessert, cooking and market; firm, crisp, juicy, sprightly subacid; Oct. and later; bears rather young.

Mammoth Black Twig—A late keeper; greenish, largely overspread dull deep red, on some soils almost black; firm; subacid; good.

Stayman Winesap—Large; greenish-yellow striped, often nearly covered with dark red; crisp, very juicy, pleasant subacid; good to very good; keeps well; bears young and regularly.

Winesap—Bright deep red; flesh yellow, very rich, crisp, very juicy, sprightly subacid; very good; Dec.-March; bears young.

Crab Apples

Transcendent—Medium to large; yellow, crimson cheek; crisp, juicy, Aug.-Sept.; productive.

Yellow Siberian—About 1-1 1/2 in. in diameter; much used for preserving whole; a young bearer.

Peaches Bear Young

Peaches often come into bearing the third year, and offer great opportunities for quick returns and give good profits to the man who will take care of his trees. *The Fruit Grower for January 1, 1917*, tells of a man in Southern Illinois who in 1916 sold \$23,000 worth of peaches from 40 acres. This is in a country not especially adapted to peaches but due to care of the orchard—fertilizing, cultivation, spraying and pruning. Do you wonder that this man is planting 3,500 more trees?

A sandy loam or gravelly soil is best, but the Peach adapts itself to any well-drained soil. If you have the choice of location give them a northern slope. Plant 16x16 feet requires 170 trees; 18x18 feet, 134 trees per acre.

Price of One Year Peach:

	Each	Per 10	Per 100
XX size, 5/8 in. cal. and up, about 4 1/2 ft. and up.....	\$0.25	\$2.00	\$16.00
Extra size, 9/16 to 11/16 in. cal., about 4 to 5 ft.....	.20	1.75	14.00
Standard size, 7/16 to 9/16 in. cal., about 3 1/2 to 4 1/2 ft.....	.15	1.40	12.50
Medium size, 3 to 4 ft.....	.13	1.00	7.00

Five of a kind at 10 rate, less at each rate; 50, not less than 10 of a kind, at 100 rate.

The following list is arranged approximately in order of ripening. The dates named are approximate average season in this section:

Mayflower—The earliest; good size, red all over, firm; semi-cling; good shipper; hardy; productive.

Greensboro—Large, colored beautifully with crimson with a yellowish cast; flesh white, very juicy; excellent; semi-cling; mid-June; hardy; profuse bearer.

Carman—Large, creamy white splashed red; juicy, rich, sweet, very good; nearly free; hardy.

Champion—Large, white, beautiful red cheek; flesh white, sweet, juicy, rich, delicious; freestone; early August; quite hardy; productive; bears young.

Belle of Georgia—Very large, white, red cheek; firm, juicy, high quality; freestone; early August; hardy, very productive; excellent shipper.

Crawford Early—Very large, yellow, deep red cheek; rich, slightly subacid; freestone; early August.

Elberta—Very large, golden yellow, crimson cheek; firm, juicy, good; freestone; mid-August; excellent for shipping, vigorous, productive, profitable.

Crosby—Orange yellow splashed red; sweet, juicy, rich; freestone; latter August; medium size; very hardy.

Oldmixon Cling—Large, creamy white, red cheek; flesh white, juicy, rich, fine; latter August; prolific.

Crawford Late—Very large, yellow, deep red cheek; juicy, rich; freestone; latter August-September.

Stump—Large, white with red cheek; flesh white, juicy, excellent; free; late August-September.

Heath Cling—Very large, creamy white, sometimes faintly blushed; flesh white to pit, rich, very juicy, sweet, fine; latter September.

Salway—Large, yellow, red cheek; flesh yellow, firm, juicy, sweet, good; freestone; late September to early October; good shipper.

Plum Trees

Price of Plum:

	Each	Per 10	Per 100
Extra size, 5/8 to 3/4-in. cal., about 4 1/2 ft. and up, branched.....	\$0.30	\$2.50	\$22.00
Standard size, 1/2 to 5/8-in. cal., about 3 1/2 to 4 1/2 ft., branched.....	.25	2.00	18.00

Five of a kind at 10 rate, less at each rate; 50, not less than 10 of a kind, at 100 rate. Arranged approximately in order of ripening; dates named are average dates here.

Red June—Japan. Dark coppery red; juicy, sweet; semi-cling; early; productive.

Wild Goose—Oval, bright red with many white dots; medium to large; cling; requires cross-pollenizing; early July; productive. X size Wild Goose are graded 9/16 in. cal. up; Std. 7/16 to 9/16.

Abundance—Japan. Large, bright red over yellow; juicy, sweet, rich, very good; cling; mid-July; hardy, productive; bears young.

Burbank—Japan. Very large, bright dark red on yellow; firm, juicy, rich sugary; cling; latter July; bears profusely.

Shipper's Pride—European. Large; dark purple or blue; firm, good quality; early September.

Shropshire Damson—European. A large Damson; dark blue; cling; latter September; vigorous.

Wickson—Japan. Large, heart-shaped; dark red; flesh solid, meaty, sweet; cling.

OTHER Fruits, Rhubarb, Shade Trees, Evergreens, Shrubs, Roses and Hardy Flowers are described on the inside pages.

Cherries Give Big Returns

Early Richmond Cherry is very productive.

"Six years ago I had a number of choice cherry trees left in the nursery after the spring delivery was over and I did not like to destroy them. So I went to a friend and spent about one-half day endeavoring to make him see where he could make some money by planting a cherry orchard. I knew this man would give the trees good care and was sure he would succeed. He finally agreed, planted the trees, gave them good care, and to date he has picked four crops of fruit from this orchard."

"These trees, six years from planting, averaged thirty gallons to the tree for the 1915 crop. He sold all of this fruit at the orchard at 40c a gallon, or at the rate of \$12 a tree. Picking cost, 6c a gallon; spraying 20c a tree, or a total of \$2 a tree for spraying and picking, leaving the income at \$10 a tree." So writes a Missouri nurseryman in the *April 1, 1916, Fruit Grower*.

Plant 18 to 20 feet apart on well drained ground. The list is arranged in the order of ripening.

Price of Cherry:

	Each	Per 10	Per 100
XXX size, 2-yr., 3/4-in. caliper up, 5 to 6 ft., branched.....	\$0.50	\$4.50	\$40.00
XX size, 2-yr., 1/2 to 3/4-in. caliper, branched.....	.40	3.30	28.00
Extra size, 2-yr., 3 to 4 ft., 1/2 to 9/16-in. caliper, branched.....	.30	2.50	22.00

Five of a kind at 10 rate, less at each rate; 50, not less than 10 of a kind, at 100 rate.

Dyehouse—A few days before Early Richmond; a productive, reliable bearer; May.

Early Richmond (May Cherry)—Medium size, round, bright red, darker when fully ripe; very juicy, sprightly acid; latter May-June; hardy, very productive; profitable; succeeds everywhere.

Montmorency—Rather large, dark rich red; juicy, pleasant acid; excellent; a week later than

Early Richmond; vigorous, hardy, productive; successful everywhere.

Royal Duke—A half-sweet Cherry; very large, dark red, juicy, rich; mid to latter June; the nearest sweet that succeeds here.

English Morello—Large, dark red, nearly black; flesh dark purplish crimson; juicy; rich acid; prolific; latter June-July; dwarfish.

Pear Trees

Price of Pear (Bartlett 5c each higher):

	Each	Per 10	Per 100
XX size, 5/8 to 3/4-in. caliper, 4 to 6 feet.....	\$0.30	\$2.50	\$22.00
Extra size, 1/2 to 5/8-in. caliper, 4 to 5 feet.....	.25	2.00	18.00

Five of a kind at 10 rate, less at each rate; 50, not less than 10 of a kind, at 100 rate.

Pears are graded by caliper or diameter. The height is the approximate average and varies with the habit of the tree. Arranged approximately in order of ripening. Dates named are approximate average here.

Clapp's Favorite—Large, yellow dotted and shaded red; juicy, perfumed; latter July-August.

Bartlett—Large, waxy yellow blushed on sunny side; juicy, fine-grained, buttery, rich; latter August; bears young; productive.

Seckel—Small but the richest and highest flavored; brownish-green becoming yellowish brown; fine-grained, sweet, very juicy, buttery; early September.

Garber—Large, waxy yellow; red cheek; early September; good for canning and market and for pollenizing Kieffer and others; especially resistant to blight.

Anjou—Large, greenish yellow, russet and red cheek; fine-grained, melting, buttery, rich; latter September.

Duchess d'Angouleme—Very large, greenish yellow, russet and dull red cheek; juicy, melting, slightly granular; Sept.-Oct.; productive, hardy.

Kieffer—Large to very large, attractive, rich yellow tinted red; very juicy, usually slightly coarse; if picked when mature but before fully ripe and ripened slowly in a cool, dark room, it develops good flavor; very resistant to blight; hardy, very productive, ships well, and a profitable pear; September-November.

Dwarf Pears

Dwarf Pear occupy little room, are valuable where space is limited, and while not so long-lived as Standards, begin bearing younger, often the year after planting. If set 4 to 6 inches deeper than in the nursery they finally become half-standards. In-

creasing their length of life. They may be planted quite close—10-12 feet, and kept headed back.

Duchess d'Angouleme—XX, 5/8 to 11/16 in. caliper. 25c each, \$2 per 10, \$16 per 100.

Seckel is of highest quality.

Grapes Bear After Freezing

Owing to the habit of bearing, if the instructions in our catalog are followed grapes will usually give a fair crop even if the first frosts are heavy. They quickly come into bearing, often yielding some the second year after planting. A gravelly soil of average fertility, preferably a southern exposure, is best suited to their needs. The home vineyard may be planted at almost any convenient place. Steep hill-sides may be used and become very profitable parts of the farm. Planted 888 feet requires 680 plants per acre.

Agawan One of the best red grapes, large, black, round berries, rich flavor. Good sweet variety, ready to stem and in late shipping grade very early. Bears profusely.

Concord The most popular large black table grape, vigorous, very hardy, healthy, productive, ready to stem and in late shipping grade.

Moore's Diamond Large, yellowish-green, juicy, good ripens a little before Concord.

Major prices are for one year No. 1 fruit. It has been demonstrated that this will give a commercial crop as soon as two-year vines. Five of a kind at 10 rates; 50 or more in lots of 25 or more of a kind at 100 rates. Write for prices in large lots.

Gooseberries

The demand for Gooseberries is always good. They are easily grown, readily respond to care, and are reliable annual bearers. Plant 355 ft. 2,200 per acre; or 145 ft. 2,475 per acre. A northern slope is preferable, especially in the Central and Southern States.

Houghton Of medium size, but a prolific bearer and a money maker. Very free from mildew, all year cultivation, the best for most sections, deep pale dull reddish brown when ripe but usually picked green.

1 1/2 to 2 1/2 inch, \$1.00 per 100, \$5.00 per 1,000.
1 1/2 to 3 inch, \$1.00 per 100, \$5.00 per 1,000.
2 to 2 1/2 inch, \$1.00 per 100, \$5.00 per 1,000.
2 1/2 to 3 inch, \$1.00 per 100, \$5.00 per 1,000.

Currants

Strong 2 year, 15c each, \$1.00 per 100, \$7.00 per 1,000.

White Dutch Full medium size, bunch rather long, yellowish white, good quality.

Blackberry, Thibodeau's or Japanese.

Of dwarf, showy, spreading habit, with graceful spiny branches and small, beautiful green leaves. An excellent assortment of single white, pink and blue and double white, pink, blue and red.

Blackberries begin bearing the second year and may be depended upon for regular, profitable crops. They thrive in almost all soils, but are not so hardy in a strong, deep loam that will retain moisture, trending towards clay rather than sand. They will succeed on soil too light, dry and poor for Strawberries and Raspberries. Plant 2 to 1 1/2 feet apart in rows 8 feet apart; 2 by 8 feet requires 2,25 plants per acre.

500 of a kind at 100 rate, 5,000 of a kind at 1,000 rate. Arranged alphabetically.

Lochet Large, with thick, sweet, 30c per 100, \$3.00 per 1,000.

Snider Mid-season, of medium size, juicy, sweet, with no highest quality. It is valuable for its extreme hardiness and productivity. Indispensable as a mid-season variety. 25c per 100, \$2.50 per 1,000.

Ward Berries large, tender, sweet, excellent quality. 25c per 100, \$2.50 per 1,000.

Blackberries Pay Well

Prof. F. H. Bailey says there is no fruit capable of yielding greater profit. Mr. R. H. Rushing says profits depend almost entirely on the management of the patch berries. There will usually be from 150 to as high as 250 cases of 24 quart cans from an acre, and that it is usually consistent to figure on an average of \$100 to \$150 per acre after paying for picking, boxes and express.

Blackberries begin bearing the second year and may be depended upon for regular, profitable crops. They thrive in almost all soils, but are not so hardy in a strong, deep loam that will retain moisture, trending towards clay rather than sand. They will succeed on soil too light, dry and poor for Strawberries and Raspberries. Plant 2 to 1 1/2 feet apart in rows 8 feet apart; 2 by 8 feet requires 2,25 plants per acre.

500 of a kind at 100 rate, 5,000 of a kind at 1,000 rate. Arranged alphabetically.

Lucretia Dewberries

Wherever there is a market for Blackberries, Dewberries will be profitable. Ripening between Strawberries and Blackberries, they command a good price. Land can be used that is too wet or not fertile enough for Blackberries, and they are less expensive to grow. Plant 2 feet apart in rows 10 or 12 feet, 5 feet apart requires 5,150 or 4,350 plants per acre, respectively.

Lucretia—Large, often 1 1/2 inches long, sweet and luscious throughout, for size and quality is unequalled by any of the Blackberries, ripens at the close of the strawberry season before Early Harvest. The variety most extensively grown for market. The top plants 25c per 100, \$2.50 per 1,000.

Raspberry Profits

Another berry that yields quick returns, beginning to bear the second year. It fills the gap between Strawberries and Blackberries, sells well and is a reliable cropper under good conditions. In the Higley Berry Book, F. W. Earl is quoted as computing the average yield from the figures of 58 growers at nearly 78 bushels per acre.

Planted 350 ft., requires 1,825 plants per acre, 2,800 per acre. Deep soil that will retain moisture in a dry season is preferable, the lighter loam for the red, the heavier for the black varieties. Arranged alphabetically. 50 of a kind at the 100 rate; 500 at the 1,000 rate.

Black Pearl A new variety that promises to become a leader among black raspberries. A little earlier than Cumberland, of good quality, but black firm, hardy, vigorous. 40c per 100, \$4.00 per 1,000.

Cardinal—Very large, very hardy, very productive, easily grown, rich flavor, purple red. Can be grown farther south than most Raspberries. 25c per 100, \$2.50 per 1,000.

Cumberland Black rasp. Very large, firm, of excellent quality, mid-season, very hardy and very productive. 25c per 100, \$2.50 per 1,000.

Rhubarb or Pie Plant

Rhubarb or Pie Plant is easily produced in a commercial way, yields abundantly and is easily gathered and put into shape for market. It can be shipped almost any distance. The demand for it on the market makes it one of the best vegetable crops for commercial use. Geo. W. Holsinger, horticulturist, says: "Rhubarb is one of the most successful and profitable crops. The secret of success is well drained soil."

Myrtle's Linnaeus Early, but because Asparagus Intense scarlet, tender, 2 to 4, or another, 25c per 100, \$2.50 per 1,000.

Horseradish

Behnson—A quick-growing variety, produces very large roots, productive, so easily grown it should find a place in every garden, a rich, moist soil is preferable. Sets, 5c each, 25c doz, \$1.00 per 100.

Asparagus

Conover's Colossal The standard market variety. Very large, growth rapid, productive; good quality. 25c per 100, \$2.50 per 1,000.

Palmetto—Large, early, productive, good, very resistant to rust, adapted to North and South. 25c per 100, \$2.50 per 1,000.

Florida—Large, early, productive, good, very resistant to rust, adapted to North and South. 25c per 100, \$2.50 per 1,000.

Hardy Evergreens

Our evergreens have been transplanted several times to secure an abundance of fibrous roots. When dug the roots are protected and they are packed under cover in a moist atmosphere.

At the prices the roots will be carefully packed in damp slugs, and have a 1 1/2 inch diameter, 2 to 4, or another, 25c per 100, \$2.50 per 1,000, 2 1/2 to 4, 25c each, \$2.50 per 100, 3 to 5, 30c each, \$3.00 per 100, and specified "dotted and huddled."

Five of a kind at the 10 rate, less at each rate.

Arborea, Chinese Golden Dwarf; **Blota aurea** nana. In the spring and later summer in intense gold, suffused with green. In winter become green to bronze green. Of superb shape, dwarf, compact habit, evergreen.

3 to 4 feet, \$3.25 each, \$30.00 per 100.
2 to 3 feet, 2.00 each, 20.00 per 100.
1 1/2 to 2 feet, 1.25 each, 12.50 per 100.
1 to 1 1/2 feet, 1.00 each, 10.00 per 100.

Arborea, **Pyramidal**—A small, extremely bushy, upright, bright green foliage, in form an almost perfect column.

3 to 4 feet, \$3.25 each, \$30.00 per 100.
2 to 3 feet, 2.00 each, 20.00 per 100.
1 1/2 to 2 feet, 1.25 each, 12.50 per 100.
1 to 1 1/2 feet, 1.00 each, 10.00 per 100.

Arborea, **Siberian**—A small, extremely bushy, tree, very dense, dark green foliage.

3 to 4 feet, \$3.25 each, \$30.00 per 100.
2 to 3 feet, 2.00 each, 20.00 per 100.
1 1/2 to 2 feet, 1.25 each, 12.50 per 100.
1 to 1 1/2 feet, 1.00 each, 10.00 per 100.

Arborea, **Globe**—A low, compact, gem-like globe with deep green foliage, assuming bronze tints in winter.

2 1/2 to 3 feet, \$1.20 each, \$10.00 per 100.
2 to 2 1/2 feet, 1.00 each, 10.00 per 100.
1 1/2 to 2 feet, 75c each, 7.50 per 100.
1 to 1 1/2 feet, 50c each, 5.00 per 100.

Juniper, **Irish**—Plenty cut, bushy green foliage, dense, slender, columnar, formal and striking in outline and very effective.

3 to 4 feet, \$2.00 each, \$20.00 per 100.
2 to 3 feet, 1.50 each, 15.00 per 100.
1 1/2 to 2 feet, 1.00 each, 10.00 per 100.

Shade Trees

Headed

A handsome shade tree bearing out of excellent quality and the bark very ornamental; very attractive in bloom. 8 to 10 feet, \$20.00 each, \$200.00 per 100.
6 to 8 feet, 15.00 each, 150.00 per 100.

Catalpa Speciosa, Western Catalpa
Of rapid growth, leaves large, dark green, heart shaped, flowers white, dotted reddish and violet patches. 6 to 8 feet, \$15.00 each, \$150.00 per 100.
4 to 6 feet, 10.00 each, 100.00 per 100.

Catalpa Bungei, Umbrella Catalpa
